

Component	NORMA
Temporal encoding	Log-delta-t + periodic
Health-state encoding	Ternary (low / normal / high)
Laboratory values	Within-sequence normalization
Age representation	Binned (decade-wide)
Context token	Yes
Output head	Quantile ($\tau \in \{.025, .25, .50, .75, .975\}$)
Architecture	8 layers, d_model 64, 4 heads
Training	Adam, lr 10^{-4} , weight decay 10^{-3} , batch 32, early stopping (patience 10)
